MPC - Project #159-3

Mission Statement

Melbourne Protective Coatings mission is to provide all customers with a seamless experience that will capture your vision for your building, property or home. We aim to provide all customers with amazing communication and professional jobsite manner. We value prompt timekeeping, a high standard of work and strive for 100% customer satisfaction. Our team arrive when we say we will, clean up after we finish and leave once you are happy. Together with an experienced team and utilising only the top industry standard products, Melbourne Protective Coatings is here to start your project today for the future you imagine tomorrow.

Harry is a great communicator
and a perfectionist.
Painting quality is outstanding.
Couldn't be happier

GINA.M

About Our Company

Born from a residential painting company with glowing 5 star reviews, Harrison's vision was to rebrand and focus on building towards a bigger future. The Melbourne Protective Coatings team draw on their combined 45+ years of experience to allow them to undertake all aspects of painting and specialty coatings.

We have extensive experience in body corporate & commercial painting for schools, housing estates, highrise apartments, hospitals as well as retail shops and warehouses. Our painters and decorators have ample experience styling and renovating homes and residential complexes too, bringing to the table innovative designs and customised solutions. If finding the right company to create your vision is paramount, look no further than Melbourne Protective Coatings.

We offer...

- Excellent resources both manpower and materials
- Hassle free, efficient paint services
- Experienced and certified painters and decorators
- Extended workmanship warranty on top of the Dulux Accredited Warranty
- Array of painting and decorating designs and solutions
- Excellent repair and maintenance program for your structures
- Reliable and timely completion of projects
- Insured services

Meet the team

Melbourne Protective Coatings team of qualified professionals use only industry best practices and the highest OHS requirements to ensure every job gets done correctly every time. We stand by our work offering an industry leading 6 Year workmanship warranty on all our projects. Feel safe knowing we are the tradesmen that stand by our work and will endeavor to ensure your project is completed on time and to your satisfaction.

Jake Hughes Painter | Team Leader

Jake is one of our 3 team leaders, Jake carries a professional and positive attitude far beyond his years, his passion for his work speaks for itself.

Steven Hofka Team Leader

Steven is also a team leader and is a big driving force within our company. Steven applies himself 100% to each project and inspires the team members around him by leading as an example

James Gorter Painter/Timber Specialist

James 10+ years experience allows him to facilitate all worksites, be it managing a crew or working autonomously, James's detailed knowledge of timberwork allows for minor repairs without the need to seek additional trades, which saves us time and you the client money.

Junior Tuii Team Leader

Junior is our final team leader and is one of best trainers in the company. With over 15 years of painting experience across 2 countries his expertise and knowledge on a range of projects always come in handy. Juniors ability to complete a large amount of work to a high standard with in a small time-frame never ceases to amaze. His dedication to completing projects on time and is always willing to go above and beyond often working late into the night to ensure your deadline is met.

Adam Kelly Admin

Adam is one of our admin staff and works closely with Peter to help make it run smoothly. If you are seeking a meeting with Harry, Adam will be able to facilitate that for you as the only member with access to Harry's busy calendar.

Lucille James Painter

Lucille's is one of our up and coming painters. Her attention to detail to ensure quality output is high is greatly appreciated, picking up on potential errors or identifying areas of concern early to help maintain good project workflow can't be understated.

Puna Tusiba Painter

Puna is one of our hard working team, he has recently joined and is taking great strides under Juniors leadership. If Puna is on your job feel safe knowing someone with great dedication is on site getting the hardwork done.

Peter Laskovsky Business Development Manager

Peter is our business development manager and is always working on the company to improve and grow. With over 12 years of running his own company. Peter also heads our administration office so feel free to contact him about any question from accounts to project timelines. If you have a query Peter will be able to assist getting you the answer you're looking for.

Harrison Cisar-Wright Director | Owner

Harrison is our ever smiling leader. His passion to his business and his customers is second to none. Harrison's knowledge and understanding scope on all projects is paramount. Harrison prides himself on the work done by the Melbourne Protective Coatings crew and takes the added care to ask all the right questions pertaining to your needs on your job.

”

From the moment Harry turned up to provide a quote for a full house paint job, I was impressed by his politeness and professional attitude...

Anti-Corrosion Membrane

Look no further than our Anti-Corrosion Membrane System for rust protection, waterproofing and heat reduction! Our system can be applied either before the rust or leaks start as a preventative measure or after it has begun to appear to solve further degradation. Our membrane is easily applied direct to any substrate, areas of highly degraded metal can be fixed with a mixture of specialised fillers and our membrane tape then coated over with our product which will seal and stop any further penetration. Our product has a 10-year guarantee and a 15 year minimum life expectancy as a corrosion class C5-M product. It is super flexible offering 200% elasticity and is impact resistant.

ISO currently rate our product as the best in the world for Anti-Corrosion under their protective paint systems division (12944). It is perfect for coastal buildings as it easily handles salt corrosion and intense weather which is why it currently coats the Golden Gate Bridge including the cables and has done so for over 30 years. Our system is not considered a stop gap until replacement but an alternative to replacement as there are currently live projects in Melbourne which were coated over 25 years ago and they are still going strong.

Our system's performance is second to none and is perfect for the harsh Australian sun as it doesn't crack or peel and offers great resistance to UV degradation. Although it is more expensive than normal painting, the life expectancy and protection it offers is unmatched and will no doubt save you money on repairs and maintenance and even replacement for decades to come. We also offer long term maintenance plans with custom scheduled timelines to give you even more peace of mind if you feel that is needed.

Heat reduction on your factory or warehouse can be achieved by choosing our white option when coating your roof and can reduce your internal building temperature by as much as 10-15 degrees which saves money on cooling costs during those hot summer months.

Commercial Epoxy Flooring

05

Hardening Liquid based flooring is one of the most versatile and durable floor coverings available on the market. As our understanding on floor coverings grows and evolves so does the products that we use. Epoxy flooring was initially the most popular with its super hard finish, variety of colours/variations and easy application. Polyurea during this time was always seen as a more premium product to epoxy with its quicker drying time, superior UV resistant properties and 4x stronger durability. It's only weakness being a under-performer with regards to moisture control.

With the new generation of Citadel Polyurea products, the worlds the leading manufacturer for Polyurea coatings, sourced from Australia's biggest supplier that issue is now solved. Melbourne Protective Coatings as with our commercial and residential painting divisions, only choose to partner and use the best products on the market to give our clients peace of mind that they've got what they paid for.

Garage Flake Flooring

06

Garage floors need to stand up to a variety of heavy uses, like vehicle parking, frequent foot traffic, workshop conditions, heavy storage and more. Melbourne Protective Coatings epoxy floor coatings provide the necessary durability, while preventing concrete dusting with over 70+ colour and flake variations, we're sure to have a colour scheme to fit your project outcome.

Range of projects

Boobytape

MPC - Project 433 | 08/2022- North Rd, Murrumbena

- Included a 3-coat system 1st a premium grade dulux acrylic undercoat and 2nd & 3rd of Dulux wash and wear on all walls and ceilings, on all trim (doors, frames, windows, skirtings) we used a premium dulux semi-gloss water based finish.
- This project was undertaken in conjunction with a bespoke builder who relied on our project management skills and high quality finish to align with their schedules and match their premium quality build expectations
- To achieve the desired quality finish, this project required the use of dust extracting sanding machines, 3 types of spray guns, several different types of undercoats and top coats.

Heritage Listed Restoration

MPC - Project 401-8 | 02/11/2021 - Northcote Town Hall

- Removal of lead based paint
- Sand prep internal & external areas
- Preservation

Residential | Canterbury

MPC - Project 466 | 02/12/2022 - Canterbury, VIC

- Full painting of exterior built pavillion and surrounds
- HIA Award 2023 Nominated build (Outside entertainment space)

Goodyear Auto Braeside

MPC - Project 442 | 08/2022 - Boundary Rd, Braeside

- This project required a full exterior wash prior to any undercoats/topcoats being applied.
- The project required the use of an all terrain scissor lift to reach areas safely.
- A three coat system with the use of specific colored undercoats was utilized to achieve the true company colors, that were specified for the project .
- The brief stipulated that a perfectly level 1.5m blue strip was to be applied around the entirety of the building, we achieved this using a laser system to ensure level perfection.
- Futhermore the level blue strip around entirety of building needed to be on top of a heavily textured surface, therefore the use of special techniques to achieve a straight line on a textured surface were utilized.

Little Latrobe St

MPC - Project 445 | 09/2022 - Little Latrobe St, Melbourne

- Tung oil on raw wooden surfaces .
- Sanding handrail using first 240, 600 1000 and finally 1500 grit sandpaper sanding with a progressively smoother paper to achieve an ultra smooth surface .
- A musline glove was used to apply all tung oil to eliminate brush marks.
- 2 x coats of wash and wear (Dulux) on all walls.
- Dulux metalshield was used for all balustrading, sprayed to achieve a smooth and even finish.

St Kilda Library

MPC - Project 448 | 09/2022 - 150 Carlisle St, St Kilda

- Complete wash of entire surface to leave surface clean for top coats
- The use of specialized rust treatment prior to top coats
- 2x top coats of concentrated zinc waterbourne single pac elastomeric rust treatment
- All surfaces were sprayed to achieve desired film thickness required to guarantee rust prevention

Client Feedback

Don't just take our word for it, read up on some of our clients feedback on what its like to engage our services.

Bridget | Founder

We recently engaged Melbourne Protective Coatings to paint our new Oakleigh store and we couldn't be happier. The result was beyond what we could have imagined. It was great that Harrison came in personally to achieve some difficult results for us which were not originally in the scope whilst still meeting our tight deadline.

Douglas Blackwell | Managing Director

Melbourne Protective Coatings are our first and only port of call for any commercial or residential painting needs. The team have in-depth knowledge of all specialised coatings and give helpful advice, making us look great in front of our clients.

Trevor Pickens | Director

When we refer Melbourne Protective Coatings to one of our clients we know the job will be done to the highest standards. Melbourne Protective Coatings have been our preferred painter for many years. Harrison and his team are diligent and punctual and trustworthy. I always relax knowing they will get the job done and add thousands to the property value. I highly recommend Harrison and Melbourne Protective Coatings for residential internal and external painting.

Mark Elliott

CEO/ Managing Director

Melbourne Protective Coatings are a breath of fresh air as we engage multiple trades across a wide range of Strata managed sites. Harrision and his team's dedication to achieving the highest quality finish is nothing short of exemplary. Its great to know when I email Melbourne Protective Coatings that no job will be beyond their range of expertise, be it highrise buildings in the CBD or heritage listed ones scattered around Melbourne, Harrison and his team always achieve our desired outcomes. Communication is key for us to keep our clients informed and up to date with project timelines, partnering with Melbourne Protective Coatings enables us to do so.
